POULTRY EQUIPMENT

Our vision

To become a model company by leading the sector in all services we provide with unconditional satisfaction and contentment of our customers and workers.

Our mission

To be a company that creates value for our customers and workers with our business solutions, reliability we provide after service and high business ethics.

To maximize customer satisfaction by providing a high standard and quality service. To respect time and rights of our customers. To increase satisfaction and moral values of our workers, fulfil our responsibilities for humankind, environment and universal values. To satisfy needs of our customers as a solution partner and with directive consulting principles in line with new and inevitable truths of science age.

We are different, because we focus on details ...

Exhaust Fans For Agricultural and Industrial Practices

- Azim-Tav has a variety of fans in two different types groups, domestic and imported.
- High performance fans.
- Specific industry production and usage advantages.
- There is spare part and service warranty.

IMPORTED Multifan BRAND FANS

▶ MF130 50" BOX FAN

▶ Mf92 36" BOX FAN

▶ MF130 50" SPECIAL FAN
MF130 54" SPECIAL FAN

▶ LIGHT REFRACTOR 140*140

DOMESTIC alfan BRAND FANS

▶ 50" BOX FAN

▶ 36" BOX FAN

▶ 50" CONICAL FAN

▶ CHIMNEY FAN

TUBULAR GALVANIZED PAD SYSTEM

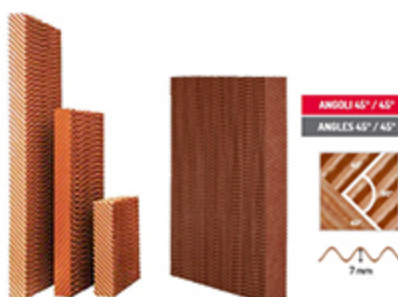

AUTOMATIC PAD COVER SYSTEM

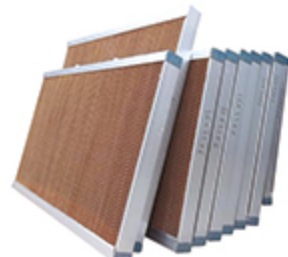

COOLING PADS

- Azim-Tav has a variety of pads in two different types groups, domestic and imported.
- Cooling pad provide environmental conditions in regions with hot and dry climates for the efficient operation of the facilities.
- This is a highly absorbent pad made of cellulose-based special "kraft paper".
- The Resins used in the production of these technological devices are innovative products recently adapted to provide better abrasion resistance, greater production against UV rays and a safer environment.
- They are also easy to replace and have minimal operating costs.

AZIM AIR INLET REFRACTOR

Feed Silos

Feed silos are the most ergonomic feed storage tools that you need. Feed silos help you obtain maximum efficiency and protect the feed from every kind of dangers. Azim Tav feed silos have low costs, easy assembly method and provide long-term, healthy and safe storage. 8.8 quality bolts and 8 quality nuts used in feed silo connections are all galvanized. Feed silo shafts with 40 degree angle produced and designed taking into consideration the angle of feed in the silo enable higher amount of feed storage compared to standard silo shafts with 30 degree angle.

Silo Scale

It shows the amount of feed in the silo. Thanks to the daily or hourly software also supporting the system, it provides monitoring for the feed consumed at desired time and period. It gives an alarm and warning when the feed level decreases.

▶ YM-MILL-SILO Q90 LOWER GROUP

▶ YM-MILL-SILO Ø90 UPPER GROUP

▶ BEARING UCF 205 SEATED

▶ SILO SCALE LOADCELL (SILO SET-6)

▶ REDUCTOR 0,75 KW 420 D/D 380 V

▶ YM-LOWER GROUP Q90 (ONE OUTPUT SILO)

▶ INDICATOR CAS

▶ YM- LOWER GROUP Q90 (DOUBLE OUTPUT SILO)

▶ YM- LOWER GROUP Q90 (DOUBLE OUTPUT SILO)

▶ SPIRAL SILO Q65

▶ YM-UPPER GROUP-SILO Q90 MM

House Control and Command Systems

The automation systems we offer to you as Azim-Tav help at making your business follow-up and management more efficient, increasing your gains from production, providing control over temperature, humidity, static pressure light.
